Skills

- **Programming Languages:** Python | Dart | C++ | Java | JavaScript | TypeScript | HTML | CSS
- **Front End Web-Dev:** HTML | CSS | Tailwind | Bootstrap | JS | TS | Rest Api | React | Context Api | Redux toolkit | Zustand
- **REACT:** Hooks | Redux toolkit | Zustand | Context Api | Router DOM | FORMIK | Framer Motion | Axios | React Hook Form
- **Back End Web-Dev:** Nodejs | Express | Mongoose | MongoDB | JWT | Passportjs | Bcrypt | CORS | Cookies | NextJS | Redis | MVC
- **Others:** DSA | DAA | DBMS | OS | OOP | CCNA | Firebase | Appwrite | Problem Solving | PostgreSQL | Git | GitHub | Socket.io | Communication Skills | Kafka | Redis | Queues | DevOps | Kubernetes | Scalable Architecture Design
- **Certificates:** Intern | COMPETE'24 | Coursera
- **Open Source Projects:** API Doc Generator , GitQuest (20+ stars)
- **Freelancing:** NextJS + Spline task, Kanban Board

Education

COMSATS University Islamabad

- Bachelors of Science in Computer Science (ONGOING | **CGPA: 3.48/4.00**)

Islamabad College for Boys, G-6/3

- Pre-Engineering (HSSC)

Islamabad Model School for Boys, G-6/4

- SSC

Summary

Web Developer with expertise in **MERN stack**, specializing in **Frontend and Backend Development**. Proven experience in delivering high-quality projects using **ReactJS and NextJS**. Strong work ethic and commitment to continuous learning. Seeking to contribute to a dynamic team focused on innovation and impactful solutions.

Experience

Junior Software Engineer

Svype

08/2025 - 09/2025

- Mainly worked as **frontend** developer and **revamped** the frontend of **Serene Heights**, project by Svype.
- Utilized **NextJS, TailwindCSS, Framer Motion, Nodemailer** (to setup emails) to revamp the existing frontend website.
- The major focus was to revamp the design, improve performance and speed of the website. **Improved speed of site by 20%**.

Full Stack Intern

Sybrid

06/2024 - 08/2025

- **Developed** frontend of **kissan360**, project by Sybrid, with **ReactJS** (Design from Figma), **TailwindCSS, MantineUI, Redux, Formik, Yup**.
- Gained **expertise** of developing frontend from **Figma** with attention to **small details**.
- The major focus was to **clone exact** Figma design pixel by pixel, **website responsiveness** with API calls to connect with backend.

Frontend Web Developer Intern

Devsinz

07/2024 - 08/2024

- **Developed** an e-learning platform **Learnify** as part of internship with **ReactJS, TailwindCSS, Firebase and Firestore** BaaS.
- The project included Admin and User Portals with multiple features like Auth, Course Creation, Enroll Course, Take Quiz, Certificates.
- Major focus was on learning **ReactJS** and website **responsiveness**.

Projects

- **SmartFlex:** I used **NextJS, Clerk, Vapi** (Agent), **Convex** (DB), **TailwindCSS, Gemini** to build AI Powered Personalized Fitness Trainer.
- **VizioRoom:** I used **NextJS, Clerk, Replicate** API (Interior Designer), **NeonDB, Appwrite, DrizzleORM, Paddle** (Payments), **TailwindCSS** to build AI Powered Room Interior Designer.
- **Kissan360:** I built its frontend with **ReactJS, MantineUI, TailwindCSS** with **Formik** (Forms), **Yup** (data validation) and **Redux** (State).
- **ArtLab:** I used **NextJS, Gemini** AI API, **Appwrite, TailwindCSS** to build an AI Text to Image Generator.
- **EzyShopper:** I used **ReactJS, TailwindCSS, MongoDB** (+ aggregation pipelines), **Mongoose, Express, Node, Redis** (caching recommended products), **JWT, Cloudinary, Stripe, Axios, Framer Motion, Zustand** (state management). Fully E-commerce type shop.
- **Learnify:** I used **ReactJS, Firebase, TailwindCSS** to complete this full-stack website. It has an admin and user portal. Full **CRUD** options on the **admin** side with features like Notification system, quiz system, course completion and certification system, profile management etc.
- **Moodify:** Used **NextJS, Firebase, TailwindCSS** to build it. Offers mood selection, calendar support, average mood, mood streak etc.
